SUMMARY

Enthusiastic and Self-driven Front end Web developer based in Karnataka, India. Skilled in C/C++, Python, HTML5, CSS Javascript ES6 languages. Innovative and a loyal team player with curious and problem solving mindset. Currently, I am pursuing 1st year of Bachelor of Engineering in Computer Science from NMAMIT.

TECHNICAL PROJECTS

STUDY RESOURCES WEBSITE, WEB DEVELOPER

May 2021

- A complete responsive website built using HTML, CSS and vanilla-tilt.js library. Built based on the 2021 UI trend Glassmorphism.
- Contains Notes, Textbooks, Software Installation Files, Video Tutorials and pretty much everything needed for 1st year B.E.

REAL-TIME WEATHER WEB APP, WEB DEVELOPER

Aug 2021

- A simple and responsive Weather web app built using HTML, CSS and Javascript. Automatically detects User location and gives Weather Details.
- It uses OpenWeatherMap API to fetch Temperature, Weather, Humidity Wind Speed details. It uses OpenCageData Geocoder API to fetch exact location coordinates of the user
- Background images are fetched from Unsplash and is changed according to the City name.

NETFLIX FRONT-END CLONE, WEB DEVELOPER

Jul 2020

- A Responsive front-end clone of Netflix website using HTML, CSS Javascript, built as a part of 7 Day Clone building bootcamp by Shapeai.tech

REST API, BACKEND DEVELOPER

Aug 2021

- A simple RESTful CRUD API made with Node.js, Express and MongoDB, built as a part of 7 Day bootcamp by ShapeAI.tech.
- Able to make basic CRUD operations(Create, Retrieve, Update, Delete). Used Mongoose for interacting with the MongoDB instance. Tested Locally with POSTMAN. Hosted on Heroku.
